A great education needs to be balanced. That's why we celebrate academic achievement alongside social, physical and emotional well-being. With us learning happens everywhere – through opportunities and activities beyond the classroom that drive thinking and drive our core academics.

We shape our teaching around each student, we value and inspire individuality. Our teachers know what is important: understanding how students think and feel, encouraging their talents and inspiring them to personal success. Empowering all to challenge what is possible, stay curious, visualise their own future and master the skills and attitude to make a difference.

At AGMS, students discover how best to learn, to learn independently and collaboratively, to manage information, to communicate and ultimately generate their own opportunities

Our mission is to provide our students with education at par international standards, which seeks to develop their full potential and to foster understanding, respect for others, freedom of thought and expression, enjoyment of learning and personal responsibility.

At AGMS, our programs, our policies, our purpose are united in the shared values that put our students at the center of everything we do. As builders of an internationally minded community, our faculty and staff strive to inspire and motivate every student while ensuring high academic challenge, the innovative use of technology and a committed focus on the social, moral and emotional well-being of every child in our care.

We look forward to forge strong partnerships with parents to create a learning environment in which our students respect and embrace an ever-growing, interconnected global society and to recognise the value of service to others.

As an Educationist, what I strongly witnessed and learnt that "Education is not filling student's mind with lots of information and expecting him to mug up and retain but its objective is to develop capabilities in the child to live a better life".

- ✦ Capabilities to Read, Write and Express his/her thoughts.
- ✦ Capabilities to observe, analyse and implement.
- ✦ Capabilities to explore the world around.
- ✦ Capabilities to listen, understand and respect everyone's point of view.

Educating a child means to work upon 3Hs of child and that's Heart, Head and Hands, where Head means giving Academic Excellence to child and enlightening him with knowledge Heart means developing child as a sensible human being who cares for people and society Hands means giving him skills and capabilities to live a better life.

The blossoming of any seed into a strong plant requires nurturing care and optimum conditions. It is the coming together of all essentials that give shape and substance to any organization or individual.

At AGMS, Shreenathpuram, the meaningful involvement of all stakeholders, parents, learned faculty members and management have propelled the school on the road to success. The distance traversed by the school during its 40 year journey glitters with several milestones, awards and accomplishments which are the product of strong team-work.

Adarsh Gyan Mandir is a global school that believes in sharing and integrating the best practices in teaching and learning. Our emphasis on values and traditions as exemplified through our assemblies and celebrations, is an endeavor to acquaint the learners with the rich and glorious traditions of our motherland and foster a sense of pride and belonging.

I wish all the students past and present, a purposeful future and the institution many more milestones of glory and fame.

Our motto 'Arise! Awake! And Step Not Till The Goal is Reached' is our clarion call that guides us on our journey towards the future.

Infrastructure & Amenities

Computer Lab

The school has the facility of Computer Education. There is a well designed computer laboratory equipped with sufficient number of computers & accessories. The school has a well experienced & qualified teacher. The school has provided its students the facility of internet. Every student gets an opportunity to become internet literate. The students gets sufficient time to surf & thus to get in touch with the world.

Science Labs

Science is not just different than other subjects; the entire process of doing science is different. The means by which knowledge is acquired in science is unlike history or mathematics or poetry. The answers to scientific questions are not found in a textbook or through pondering high and lofty thoughts. Discoveries made in science are done so through the process of experimentation which is performed in a laboratory.

AGMS is equipped with latest Physics, Chemistry, Biology Laboratories.

Library

A school library is an important source of knowledge to young minds in schools. It develops the important habit of reading among the students. For this purpose a well –equipped and stocking library with different types of books, magazines, periodicals and newspapers are available at AGMS. Apart from encyclopedias and reference books on all subjects, the content-rich library at AGMS School has comics, story books and illustrated dictionaries as well, for overall development of young minds.

Co-Curricular Activities

Music & Dance Activities

We conduct various music and dance activities for our students, which helps foster physical skills and contributes to child's creativity and imagination. It includes contemporary, free style and sequence dancing

Inter Class Competitions

Competition = Effort + Achievement

To build up in our students a hardy resistance to the pressures of life and imbibe in them equanimity in taking both success and defeat, AGMS conducts a host of competitions like English Elocution, Chart Making, Dance Competition, Fancy dress, song competition etc.

Special Workshops for Children

We offer educative workshops for children, parents and teachers. Children's workshop target different dimensions of child's personality. Some of these workshops includes persona build up, stress free living, Good touch and bad touch, Safe internet use etc. Such highly informative workshops help the student to gain information about their way of work and how things take place
